SUMMARY

Full Stack Developer with professional experience building recruitment and CRM applications using React, Next.js, Node.js and Python-based FastAPI backends. Experience in AI-powered resume processing, third-party API integrations, authentication and AWS deployment workflows. B.Tech graduate in Computer Science and Engineering (AI & ML).

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++

Frontend: React, Next.js, Redux Toolkit, Tailwind CSS, React Router

Backend & Databases: Node.js, Express.js, FastAPI, Flask, REST APIs, JWT, OAuth, MongoDB, MySQL, PostgreSQL

AI & Cloud: OpenAI API, Scikit-learn, TensorFlow.js, AWS S3, AWS EC2

Tools: Git, GitHub, Docker, Linux, Postman, Render

PROFESSIONAL EXPERIENCE

UFS Networks

Jun 2026 – Present

AI & Full Stack Developer

Remote / New Delhi

- Develop and maintain full-stack recruitment and CRM applications including Innovora, using React, Next.js, Node.js, Python, FastAPI and REST APIs.
- Migrate a React frontend to Next.js, restructuring routes, layouts, authentication guards and contexts; resolve module imports and frontend API integration issues.
- Build responsive CRM landing, login and registration pages and reusable interface components; debug Google OAuth, JWT validation and protected-route issues.
- Implement OpenAI-powered candidate processing and AWS S3 integrations; work with AWS EC2, Linux and environment configuration to support application deployment.

UFS Networks

Dec 2024 – Sep 2025

Full Stack Developer Intern

New Delhi

- Built a resume-processing pipeline using AWS S3 and OpenAI APIs to extract structured candidate skills, education and experience for recruiter dashboards.
- Developed Zoom API interview scheduling with automated email invitations and a calendar-style dashboard for recruiter-side interview management.

Jaipur Smart City Limited

Jul 2024 – Oct 2024

Frontend Developer Intern

Jaipur, Rajasthan

- Developed a React, TypeScript and Redux Toolkit surveillance dashboard with multi-camera streams, maps, incident tracking, notifications and role-based access control.
- Applied lazy loading and code splitting; labelled Roboflow datasets and collaborated with the ML team to integrate detection outputs into the frontend.

PROJECTS

Health Insight Web App

Jun 2026

React, Flask, Python, Scikit-learn, Tailwind CSS

Live Demo

- Built a symptom-based prediction prototype using an SVM model and a Flask JSON API; migrated the frontend from Jinja2 to React and added voice input with fuzzy phrase matching.
- Deployed the React and Python application on Render with symptom-based informational outputs.

EDUCATION

Haldia Institute of Technology

Sep 2022 – Jun 2026

B.Tech in Computer Science and Engineering (AI & ML)

Haldia, West Bengal

CGPA: 7.2/10
